H

Art Unit: 2674

#### **DETAILED ACTION**

### **Drawings**

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "correction circuit unit includes OP Amp or transistor" (claim 3), "gate driving power supply unit includes DC/DC converter having OP Amp or transistor" (claim 4), "the OP Amp or transistor is formed on gate turn-on line" (claim 5), and "the OP Amp or transistor is formed both on gate turn-on line and gate turn-off line" (claim 6) must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

2. The drawings are objected to because page 7, line 3-7 of the specification discloses "a corrected power supply unit 16 for supplying saw type signal corrected in the correction circuit unit 14 to gate driver IC", however, Fig. 3 of specification shows that the corrected power supply unit 16 supplying signal to the correction circuit unit 14 not to the gate driver IC. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

## Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Page 3

Application/Control Number: 10/034,821

Art Unit: 2674

4. Claims 1-6 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The specification does not provide any adequately written detailed description, e.g. circuit diagram, flowchart, etc., as to how the correction circuit unit for applying control signal from the control circuit unit to correct an analog signal from the gate driving power supply unit into a saw type signal. The specification also does not disclose what kind of control signal is to be applied to the correction circuit unit.

- 5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

  The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 6. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

As to claim 1, it is unclear and confusing as to "a control circuit unit for applying control signal to analog signal outputted from the gate driving power supply unit" since it is confusing as to what is meant by a control signal is be applied to an analog signal. In line 12, the term "a saw type" is confusing since it is not clear if this is signal or waveform.

#### Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Application/Control Number: 10/034,821

Art Unit: 2674

Takeda (US. PAT. NO. 6,456,268) teaches a LCD having a gate-on voltage changing circuit.

Yang et al (US. PAT. NO. 6,606,088) teaches a LCD panel having a power distributor.

Moon (US. PAT. NO. 6,407,729) teaches a LCD having a gate voltage generating unit.

Tsuchi et al (US. PAT. NO. 5,818,406) teaches a LCD device having power source circuits.

Ito (US. PAT. NO. 6,249,270) teaches a LCD device having a power source for gate driver.

Moon (US. PAT. NO. 6,373,479) teaches a power supply apparatus of an LCD.

Ueno et al (US. PAT. NO. 6,091,387) teaches a LCD device and driving method of the same.

8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Regina Liang whose telephone number is (703) 305-4719. The examiner can normally be reached on Monday-Friday from 9AM to 5:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Richard Hjerpe, can be reached on (703) 305-4709. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 305-3900.
